

Veritas Shield Integration with Skopos' Scanning Service Documentation

Endpoint: `/detect-pdf`

Description

PDF profanity detection service integrating Veritas Shield API with Skopos' Scanning Service

Method

`post`

Headers

- Authorization: Bearer {token}
- Content-Type: multipart/form-data

Request

PDF file via form-data with file parameter

Response

```
json
{
  "isProfane": false,
  "message": "No sensitive words detected"
}
```

or

```
json
{
  "isProfane": true,
```

```
"detected_words": ["word1", "word2"]  
}
```

Error

- 400: Invalid file format
- 401: Invalid authentication
- 503: PDF service unavailable

Notes

- PDF service token is cached for 60 minutes
- Supports custom word lists per client
